

Clinical Cases for your consideration

Case 1

No response to thermal/electric test

Percussion/palpation (-)

Diagnosis

Pulpal:

Periradicular:

Case 2

No response to thermal/electric test

Percussion/palpation (-)

Diagnosis

Pulpal:

Periradicular:

Case 3

Cold: Exaggerated/hypersensitive but not lingering (++)

Percussion (++) ; Palpation (-)

Diagnosis

Pulpal:

Periradicular:

Case 4

No response to thermal/electric test

Percussion negative; palpation positive

Diagnosis

Pulpal:

Periradicular:

Case 5

Cold: Exaggerated/hypersensitive but not lingering (++)

Percussion (-); Palpation (-)

Diagnosis

Pulpal:

Periradicular:

Case 5

Caries excavation lead to **pulp exposure**

Final Diagnosis

Pulpal:

Periradicular:

Things to remember

- Gather as much information as you can—listen to your patient.
- Determine the risk level(s)
- Analyze your findings
- Obtain consults
- Establish a basic treatment plan
- Provide initial therapy

Things to remember

- Evaluate results
 - Establish goals
 - Continue treatment
 - Specialty referral
-
- Complete Treatment Plan
 - Continuing Care
