Telephone appointments for 5M Nutritionists

1. Nutritionists will review the daily schedule of the prenatal providers, and identify the patients who could be seen for nutrition. The Nutritionist will call patients to schedule telephone visits.
2. Providers are encouraged to schedule Prenatal Nutrition telephone visit while they have the patients on the phone to minimize the number of phone calls or attempts to reach out to the patient.
3. The Nutritionists can see patients who come into clinic, and do warm handoffs by calling telecommuting RD at home.
