

MyResearch Configuration - Windows 10

Created by Rhett Hillary, last modified on May 03, 2018

This job aid explains how to access your MyResearch account using your Control Panel in the Windows 8/10 environments. If you regularly use the same computer to connect to your RemoteApp sessions, you can now add a direct connection from your computer's Control Panel.

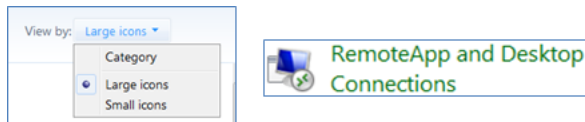

Click the **Start** button

and select the **Control Panel**.

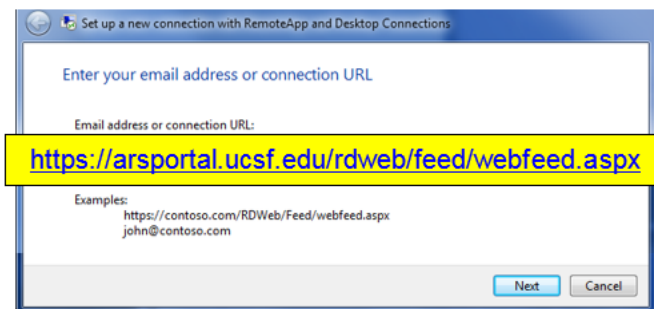

Switch to the Icon View and select the **RemoteApp and Desktop Connections** option.

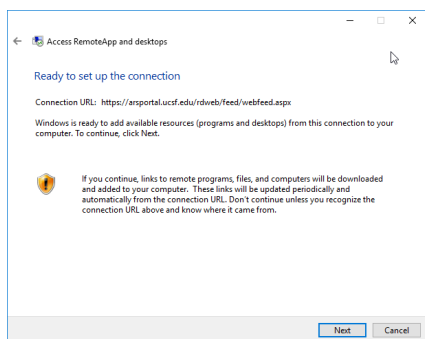

Click the **"Access Remote Apps and Desktops"** text on the left of the pane

Access RemoteApp and desktops

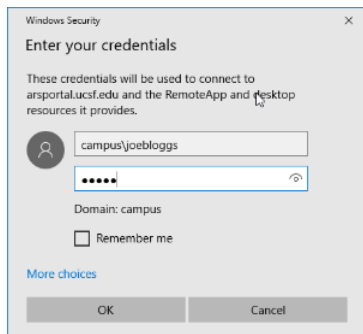

Complete the **connection URL**: field and press the Next button. <https://arsportal.ucsf.edu/rdweb/feed/webfeed.aspx>

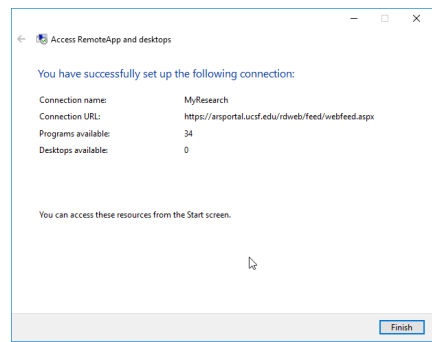

On the **Ready to set up the connection** screen, click the **Next** button.

Complete the **Enter your credentials** fields with the appropriate domain\your username, your password and click the **OK** button

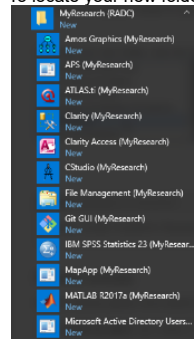

When a new connection screen displays, click the **Finish** button.

You have now added a folder to your Windows 10 Start Menu from which you can launch all of your MyResearch applications.

To locate your new folder, click the Start button, scroll down to the MyResearch folder.

Click on the application you would like to launch.

 **Questions or Concerns?**
